Hi, My Name is Mohammad and I am a passionate Frontend developer with **4+** years of experience in **React**, **Vue** and **Typescript**, I Really love developing and maintaining large scale applications using high tech-stacks and best practices.

I also **created** some **online courses** for those who want to start their frontend journey on **Toplearn** website

Technical Skills

- Vue
- Nuxt
- React
- Nextjs
- Typescript
- TailwindCSS
- Micro FE
- Nodejs
- Bootstrap
- NPM
- HeadlessUI
- ShadCn
- Pinia
- Vite
- Webpack

Work Experience

AI HomeDesign

2023 - Present

Frontend Engineer - Toronto - Canada

- Created AI-Based product using Nuxt 3, Vue 3 and typescript with Hybrid rendering strategy and custom modules powered by Nuxt internal modules system
- Used Pusherjs for realtime connection using websockets with our server to ensure that our AI-generated results are delivered just in time.
- Created and Maintained a unified design system using tailwindCSS and headlessUI
- Developed a complex state management structure using Pinia for main user flow from upload to generate
- Used **18n** module and a fully customizable back office for localization and multilingual purposes

Revivoto

2021 - 2023

Frontend Developer - Vancouver - Canada

- Designed and Developed a fully featured website using Typescript, Vue and Nuxt, also connected two different projects together using vite.
- Maintained a fully dynamic user dashboard that was connected to Stripe and Different payment methods
- Used SCSS and a custom design system to create unified style system
- Created a robust frontend architecture using **FSD** pattern to separate business logic and whole UI

Trader4

2019 - 2021

Frontend Developer - London - England

- Created a Unified Module that extends Nuxt capabilities and features with type script
- Developed a fully functional reusable UI and utility functions to use all over projects
- Created Couple of NPM Packages to deliver our product features to other developers that use our product

Courses & NPM packages I've Made

Vue 3 & Typescript Basics

Toplearn - Completed

Created an online course that covers Vue 3 & Typescript basics for those who want to start their frontend career with Vuejs framework and others that want to

Vue 3 Todo Application

Toplearn - Completed

Created another Vuejs-related course and on this one I developed a fully functional Todo Application using latest technologies and a dynamic backend API

React & Typescript Basics

Toplearn - Completed

as a dedicated frontend developer, it is really nice to be familiar with more than one frontend framework so I created a react and typescript basics course for those who want to pursue their react path through frontend development

Typemate

NPM Package - Utility Helpers

The Main approach of creating this NPM package was to develop my typescript & testing skills and a new tiny version of **Lodash**. typemate is still in development phase and lots of new features gonna be released soon. also you can collaborate on this package.
